MODERN & FULLY CUSTOMIZABLE WORK STATIONS

Out of all of Open Plan Systems' products, the XPand System is the most modern and customizable option to date!

XPand offers all of the flexibility to create workstations that best suit your business: from interchangeable storage and accessory options to stations, which range from stationary workspaces to stations with adjustable heights.

PAIRED WITH THE ALL NEW SIGNATURE PROGRAM

The XPand System falls under our Grade 2 Signature Program, and offers the following:

- All new manufactured product
- The largest selection of fabrics and finishes
- Customizable designer looks
- No minimum or maximum purchase

FINISHES

All Grade 2 Series fabrics (300+)

All Grade 2 Series work surfaces (19)

XPand Up

MS

WF

XPAND UP: Additional base paint colors available as a special order. Extended lead time applies.

XPAND REACH BENCHING

Reach, the Benching option of our XPand System, brings the idea of an open workspace to the next level. Reach provides you with the opportunity to expand your work surfaces horizontally, allowing a more flexible workspace for you and your employees.

Designed to foster a more open environment, Reach has the perfect balance of privacy and accessibility for you and your employees.

Bench Seat w/ Seat Cushion

822B Harmony - Mid Back Elevation Chair

Complement with Low Desking Storage Box/ File with Seat Cushion (standard with casters, but feet also available)

Wire Management Cable Tray

XPAND UP ADJUSTABLE HEIGHT TABLES

Who really wants to be in the same position for the entire workday? The XPand Up: Adjustable Height Tables give employees the freedom to shift postures throughout the day.

Rather than staying seated at your desk all day, it is important to move about the office. Discomfort from prolonged office work can be remedied by shifting from a seated position to a standing one. Adding the XPand Up: Adjustable Height Table to your office can ensure that your employees have the tools necessary to vary their posture throughout the day.

XPAND UP EXCLUSIVE FEATURES

3 Stage Lift
Quieter Motor
Greater Range
Faster Speed

4 Programmable Heights
(range from 25.5" - 52")

Gang stations together for added stability!

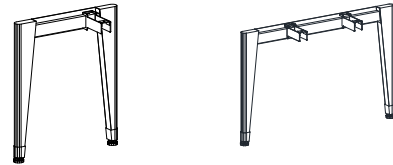

XPAND REACH BENCHING COMPONENTS

END LEG ASSEMBLY

Used to support both ends of XPand Reach Benching System. If you have a single run without stations facing each other, choose the single option. If you have stations facing each other, choose the double option.

XPAND POWER OPTIONS

Our XPand Systems come with several power options. This includes a **single circuit 3-wire option** that can be plugged into the wall or a four circuit, **8-wire power option** that can be connected either in the floor or ceiling.

- The power for your system is specified by choosing between a floor or ceiling option.
- A **power block** can be used to join the in-feed to jumpers or to connect the **jumpers** together. In addition, outlets are connected to the power block. Each power block is supplied with six ports, two for power to pass through and four for duplex out connectors.
- There are two options when exploring **duplexes**. First, you can either plug in with a USB charging and two outlets or you can snap in 3-wire or 8-wire power sources. 8 Wire offers the I, II, III and IV circuits and is available with or without USB charging capabilities.
- Power strips** are an easy, plug-in option, to run power along stations. They can be concealed along cable trays.
- There are multiple **wire management** options available for XPand! To see our full selection, visit www.openplan.com.

WIRE MANAGEMENT

Multiple wire management options are available for any XPand configuration!

CABLE TRAY

Available in 18", 24" and 30"

CABLE HOLDER CLIP

3 WIRE (1 CIRCUIT) JUMPERS
